

UNIVERSITY ADMIT ELIGIBILITY PREDICTOR

Team ID	PNT2022TMID19942
Project Name	University Admit Eligibility Predictor

OBJECTIVE:

In the current world scenario, it is not enough for a student to just have an Under Graduate degree. Most employers now look for higher qualifications in their new recruits. As a result, the demands for a good higher education are at an all time high. A lot of students from India prefer to continue their higher education with foreign universities, especially in the India. In order to get admitted to these foreign universities, a set of academic requirements are needed. However, because of the sheer number of universities of different levels, students are often stuck in a dilemma till the very last minute as to whether or not their applications will be accepted or not as no concrete documentation is available which lists the requirements..

Whatever maybe their scores, this application helps to find the best colleges. Hence, our proposed computer aided system will help the students to get the list of all colleges in which they could get the admission at the click of a button.

The students only have to enter their marks of GRE, TOFEL, UNIVERSITY RANK, etc. With this application the students can very easily obtain the list of colleges even branch wise and course wise. This will not make the admission process easy but also minimizes stress for students. The main objective of our system is to make the right choice of colleges.
